Question

With their distinctive cone shapes and steeply sloping sides, the volcanoes Hverfjall (Iceland) and Toliman (Guatemala) may look similar from afar. Tehnuka Ilanko and other volcanologists, _____ can tell by how each was formed that Hverfjall is a cinder cone volcano, while Toliman is a composite volcano.

Which choice completes the text with the most logical transition?

Answer

- A. for example,
- B. in addition,
- C. therefore,
- D. though,

Correct Answer: D

Rationale

Choice D is the best answer. "Though" logically signals that the information in this sentence—that volcanologists can distinguish the two volcanoes by how they were formed—presents a qualification or exception to the previous statement that the volcanoes look similar. The volcanoes are actually of two different types.

Choice A is incorrect because "for example" illogically signals that the information in this sentence exemplifies the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually of two different types. Choice B is incorrect because "in addition" illogically signals that the information in this sentence merely adds to the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually of two different types. Choice C is incorrect because "therefore" illogically signals that the information in this sentence is a result of the previous information about the volcanoes looking similar. Instead, the sentence presents a qualification to that apparent similarity—the volcanoes are actually of two different types.
